Bamboo Napkins · Dining Napkins · Dispensing Tissue · Toilet & Kitchen Rolls

One partner for your tissue & hygiene needs.

Alternuts Group supplies tissue and hygiene products to hotels, restaurants, caterers, distributors and importers. Every item in this catalogue is available plain, printed, or custom-made under your own brand.

Bamboo Napkins p. 04 – 05

Unbleached bamboo-fibre napkins in three formats — flat-fold, 8-fold and dinner size, 2-ply, 32 × 33 and 40 × 40 cm.

Dining Napkins p. 06 – 12

Twelve napkins in four tiers — Classic 1-ply, Premium 2-ply, Table Fold 8-fold and Signature 3 & 4-ply, 27 × 30 to 40 × 40 cm.

Dispensing Tissue p. 13 – 14

L-Fold for counter dispensers and M-Fold hand towels for wall dispensers, 2-ply, single-sheet delivery.

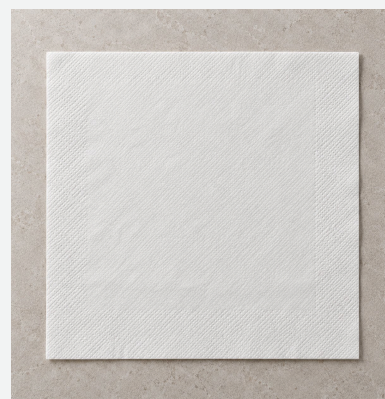

Toilet Rolls p. 15

Four single-roll sizes from 300 to 456 sheets, plus 6, 10 and 12-roll packs. 2-ply throughout.

Kitchen Rolls p. 16

Five builds — 2-ply tissue, heavy-duty, non-woven, bamboo fibre and coloured. 80 to 110 towels per roll.

Institutional p. 17

Made to specification — 10 × 10 to 40 × 40 cm, 1 to 4 ply, 15 or 17 GSM, custom print and packaging.

Consistent specs

Size, ply, sheet count and carton quantity are fixed per SKU, so every re-order matches the last one.

Four ply options

1, 2, 3 and 4 ply across one size ladder — move a customer up or down without changing supplier.

Your brand on it

Custom pack print and printed napkins under your own label. MOQ: 25+ cartons per SKU. Export: 1 mixed container.

Scale with you

From carton-level orders for outlets to container loads for distributors and export.

One size ladder. Four quality tiers.

A café counter, a banquet table and a hotel washroom do not need the same tissue. They need different weights, folds, sizes and pack formats. Dining Solutions organises the full napkin range into four tiers so the choice is clear before the first sample is opened — and the specification panel is identical across all of them, so a distributor can move a customer up or down the range without re-learning the product.

SHEET SIZES, DRAWN TO SCALE

Naturally soft. Responsibly chosen.

Bamboo is a fast-growing, renewable fibre, and tissue made from it does not need to be bleached white to look finished. Alternuts Nature brings that material to the table in formats hospitality operators can use every day: standard napkin sizes, standard pack counts, and a natural tone that signals the choice without a word of explanation.

Three formats cover the service day — a flat-folded everyday napkin, an 8-fold napkin for set tables, and a full dinner-size napkin.

DINING SOLUTIONS

Designed for every table, every service.

A food court and a fine-dining room serve very different tables, but both need napkins that arrive on time, in the right size, at the right price point.

Classic is the everyday 1-ply napkin for volume service. Premium is the 2-ply hospitality standard in five sizes and three finishes. Table Fold is the ready-to-place 8-fold napkin for set tables. Signature is the luxury 3-ply and 4-ply range for venues where the napkin is part of the experience.

Everyday 1-Ply Napkins

Classic is the working napkin of high-volume foodservice: one ply, two sizes, three pack counts. Specified for operations where napkins are consumed by the thousand — quick-service restaurants, food courts, cafés, canteens, catering and takeaway — and where the pack count matters as much as the sheet.

Premium 2-Ply Napkins

The core of the Dining range and the tier most hospitality buyers specify first. Two plies give a napkin that is softer in the hand, holds up in use and presents better on the table than a single-ply sheet. The tier is organised by size — five sizes from 29 × 30 cm to a 40 × 40 cm dinner napkin.

Plain

White sheet, no print. The default for most hospitality accounts.

Print

An all-over design from the Alternuts pattern library, including an occasion set.

Border

A printed edge on a plain centre. Colour without distracting from the table.

CHOOSING WITHIN PREMIUM

01

Table

Café and casual tables take 29 × 30. Hotel dining rooms and banquet tables take 32 × 33 or 33 × 33. Full dinner service takes the 40 × 40 Grande.

02

Pack

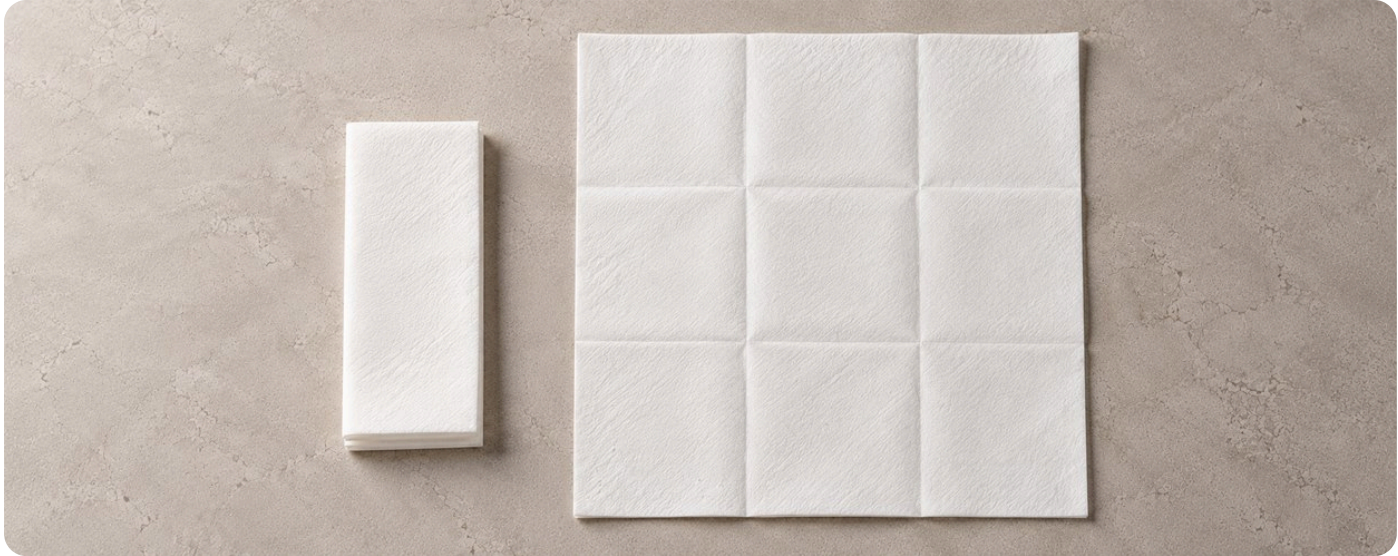

45- and 50-sheet packs suit daily restocking; the 25-sheet Premium 33 pack suits distributors supplying smaller outlets.

03

Finish

Plain is the safe hospitality default; Border adds identity without noise; Print is for venues and occasions that want the napkin noticed.

Premium Presentation. Ready for the Table.

An 8-fold napkin is folded into eighths at the point of packing, so it arrives as a neat, compact rectangle that goes straight from the carton onto the plate, into the holder or under the cutlery. No folding station, no inconsistency between tables, and a stack that stays tidy through a long service.

Where Table Fold earns its place

Application	Why it works
Banquets and weddings	Hundreds of covers set identically in minutes.
Catering and events	Pre-folded stock that travels flat and sets fast.
Hotel restaurants and corporate dining	A consistent standard across every shift.

Made for experiences that matter.

In a fine-dining room, a luxury hotel or a banquet hall, the napkin is part of the setting. Signature is built for those tables: three and four plies of tissue that give a sheet real weight, a softer hand and a drape closer to linen than to paper. The tier is named by ply, because ply is the decision.

PROFESSIONAL HYGIENE

Designed for high-usage environments.

Outside the dining room the requirements change. Tissue is dispensed rather than placed, consumed hundreds of times a day, and judged on hygiene, control and refill economics rather than presentation.

Two dispensing formats — L-Fold for counters and tables, M-Fold for washroom hand-towel dispensers — deliver one sheet at a time so that consumption is controlled and the dispenser stays clean.

L-Fold & M-Fold

Both formats are 2-ply, and both are designed to be pulled one sheet at a time from a dispenser. The difference is where the dispenser sits and how the sheet is folded.

Toilet Rolls

Two-ply toilet rolls in four single-roll sizes and three multi-pack formats. Specified for hotels, offices, hospitals and commercial washrooms where refill frequency drives the cost, and for retail and wholesale accounts that sell by the pack.

Single Rolls

Four roll sizes, from a 300-sheet everyday roll up to a 456-sheet roll that runs longest between changes. Two plies throughout, supplied plain.

Longer rolls, fewer refills. The 456-sheet roll runs roughly 50% longer than the 300-sheet roll, which is what large washroom estates look at first.

Kitchen Rolls

Kitchen towel rolls in five builds — two-ply tissue, heavy-duty single ply, non-woven for wet strength, bamboo fibre and a coloured range for colour-coded cleaning. From 80 to 110 towels per roll.

Tissue & Heavy-Duty

Two-ply tissue rolls for everyday wiping, and a heavier single-ply build at 40–60 GSM for grease, oil and larger spills.

 **Non-woven holds together when wet**, so one towel does more work before it tears — the reason commercial kitchens specify it over tissue for heavy cleaning.

Make it yours.

Large hospitality groups, healthcare networks, corporate facilities and institutional caterers often need a napkin that is not on any standard list: a particular size for a particular tray, a specific ply for a specific cost target, a logo on the sheet, a pack count that matches their storeroom.
